About Madrid

Madrid, the capital of Spain, is a cosmopolitan city that combines the most modern infrastructures and the status as an economic, financial, administrative and service centre, with a large cultural and artistic heritage, a legacy of centuries of exciting history.

Strategically located in the geographic centre of the Iberian Peninsula at an altitude of 646 m above sea level, Madrid has one of the most important historic centres of all the great European cities. This heritage merges seamlessly with the city's modern and convenient infrastructures, a wide-ranging offer of accommodation and services, and all the latest state-of-the-art technologies in audiovisual and communications media. These conditions, together with all the drive of a dynamic and open society –as well as high-spirited and friendly– have made this metropolis one of the great capitals of the Western world.

It has been populated since the Lower Palaeolithic era, although it was not until 1561 that King Philip II made Madrid the capital city of his vast empire. The historic centre, also known as the “Madrid of Los Austrias” (in reference to the Hapsburg monarchs), and the spectacular Plaza Mayor square –inaugurated in 1620 and one of the most popular and typical sites in Spain– are a living example of the nascent splendour of the city in the 16th and 17th centuries.
