About Netherlands

The Netherlands, a country in northwestern Europe, is known for a flat landscape of canals, tulip fields, windmills and cycling routes. Amsterdam, the capital, is home to the Rijksmuseum, Van Gogh Museum and the house where Jewish diarist Anne Frank hid during WWII. Canalside mansions and a trove of works from artists including Rembrandt and Vermeer remain from the city's 17th-century "Golden Age."

The climate of the Netherlands is temperate, with gentle winters, cool summers, and rainfall in every season. Southerly and westerly winds predominate, and the sea moderates the climate through onshore winds and the effect of the Gulf Stream.

The Netherlands is a densely populated country in part reclaimed from the sea with about half of its land lying below sea level. Many tourists only come to the Netherlands to visit Amsterdam. But Holland has plenty to offer outside its capital. Crisscrossed with canals, the flat landscape is perfect for cycling with historic town centers, classic windmills and other tourist spots sprinkled across the country. In the west and north the long coastline is marked
