

Market Analysis:

Scientific Federation is overwhelmed to announce the commencement of “7th International Congress and Expo on Bioscience and Biotechnology”, at Paris, France during September 23-24 2019.

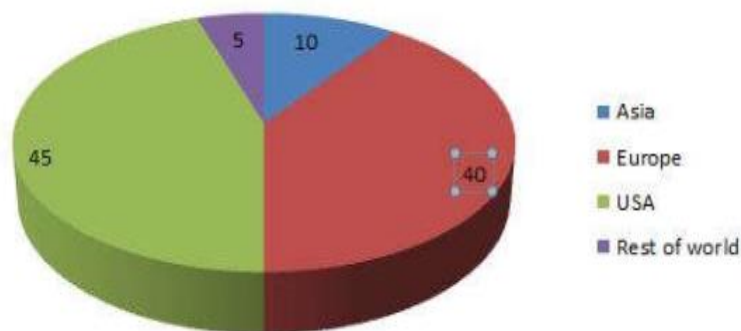

The conference will be organized on the theme [“To Solve Local and Global Grand Challenges in Bio-Field”](#).

Summary

Bioscience-2019

[“7th International Congress and Expo on Bioscience and Biotechnology”](#) at Paris, France during September 23-24 2019 which adapted the theme [“To Solve Local and Global Grand Challenges in Bio-Field”](#). The event will have plenary speakers, established Keynote speakers, active Invited speakers and fresh contributed speakers. In addition, variety of poster presentations along with workshops and special sessions would be interested in audience including establishing new collaborations. Bioscience-2019 brings you all Leading Academic Scientist, Researchers and research scholars to exchange and share their experiences and research results about all aspects of Bio-field. Bioscience-2019 gathers all recent innovations, trends, and concerns, new challenges and the solutions adopted in the Bio-field.

Bioscience and Biotechnology is a highly interdisciplinary field that combines biological sciences with engineering technologies to manipulate living organisms and biological systems to produce products that advances healthcare, medicine, agriculture, food, pharmaceutical. In recent years, the bioscience and biotechnology industry has been defined by a number of mergers and acquisitions as well as several companies going public. Biotechnology draws from Bio molecular and cellular processes to invent products ranging from drugs to industrialized enzymes. The global biotechnology industry at present features over 250 products for healthcare alone.

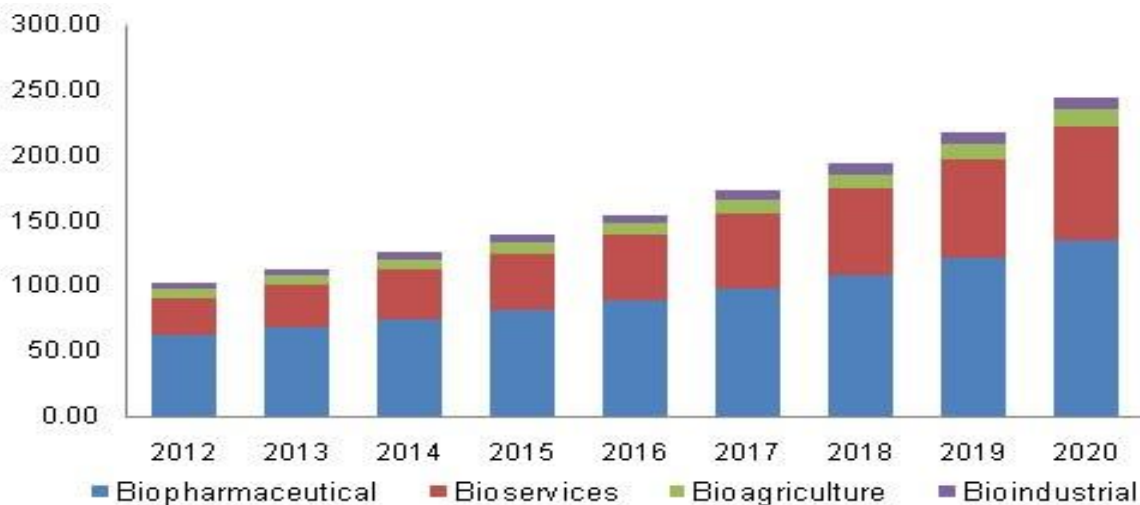

Statistics which shows Market growth:

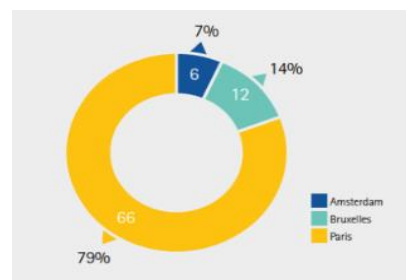

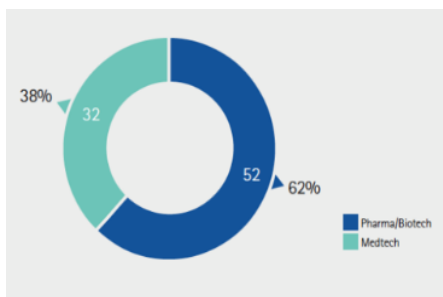

The biotech industry in Europe spends almost \$7.32 billion in [Research and Development](#) and \$23.2 billion in revenue. Approximately 20% of the total marketed medicines, and as much as 50% of all drugs that are in the pipeline, are all healthcare biotech products. The European biotech industries provide employment to more than 95,000 people.

Opportunities in the French market:

The graph below captures the size of the France bioscience and biotechnology industries and estimated growth until 2020, with contributions of BioPharm, bioservices, bio-agriculture, and bio-industrial segments. Among the most looked for after and deliberately essential biotechnologies are tissue designing, [Nano-biotechnology](#), aging, DNA sequencing, cell-based examine, and chromatography. Various novel businesses with an importance on at least one of these biotechnologies have staked their cases to the finest spots of biotech stocks to pay special mind to.

Breakdown of issuers by sector: 62% of [Biotech-Pharma companies](#) and 38% of Med-techs
 Breakdown of issuers by market place in Europe: 79% Paris; 14% Brussels, 7% Amsterdam

Why to attend???

Bioscience conference mainly interacts with members across the globe engrossed on learning about surgical and its specialties. This is the single best opportunity to reach the largest participants. [Sharing the knowledge and demonstrations](#), information and B2B meetings with industrialists and potential clients to make a splash with innovative products live and brand recognition at this event. World prominent speakers, the most recent techniques, and the latest updates in Surgery are hallmarks of this conference. (Replace with Paris Content)
