Invitation

Mark Your Calendars for 3D Printing & Modeling2020

It is our pleasure to welcome you to the Global Summit on 3D Printing & Modeling. The 3D Printing & Modeling 2020 Conference will be held May 07-08, 2020 in beautiful Porto City at Portugal.

The 3D Printing & Modeling2020 includes 40+ plenary lectures, dedicated poster sessions and interactive elements. The medium-large size of the conference makes it an excellent forum to share new data, and to network with colleagues and speakers

The 3D Printing & Modeling2020 conference runs for 2 days, from Thursday 07to Friday 08 May 2020 and it will deliver an outstanding scientific program, meaningful networking opportunities and memorable cultural experiences to delegates from 60+ Countries.

Meeting Objectives 3D Printing & Modeling-2020

- To discuss recent clinical practice guidelines about glycemic goals
 - Rapidly changing strategies in cardiac drug management
 - 30+ Speakers and Sessions
 - International Workshops and Symposia on latest trends
 - Build & Grow Your Professional Network
 - Impact of 3d printing on our communities
 - International Workshops and Symposia on latest trends
 - Brand Establishment
 - Exchange experiences in 3d printing research and promote discussions during conference
- ****Event capacity is limited, so sign up soon**

May 07-08

Why with us?

Scientific Federation Conferences is global covering Life Sciences, Physical Science & Engineering, Social Sciences and Health Sciences Conferences. We are currently focused solely on Medical related Events, Conferences and Innovations. Our main emphasis is on managing meetings, events and conferences for the scientific research and medical fields. We have brought together a multidisciplinary team, composed of scientist from various reputed organizations and universities across the globe.

The Company of Scientific Federation Conferences is a self-funded dedicated to supporting and inspiring the Health care community. We've built a wealth of knowledge in medical and scientific meeting planning and understand how to meet the complicated and specialized requirements scientific research events often demand. We bring together specialized knowledge on handling conferences with latest technology and effective communication to ensure excellence. We are committed to ensure that the changing demands of health care system are understood and the best results are delivered.

Other Salient Features Comprehend

- Publishing of the accepted abstracts in our inordinately indexed journals
- Each of which will be labeled with a Digital Object Identification Number (DOI)
- Distinct abstract and Speaker page creation, which profusely aid in citing the research and researcher in the top search engines.
- Career Guidance Workshops for students and early career researchers

May 07-08
Porto, Portugal

Tentative Agenda

May 07, 2020

May 08, 2020

Time	Sessions
08.00 - 09:00	Conference Enrollment
09:00 - 09:15	Welcome Note

Exhibitors can reach the stall @ 9:00 AM simultaneously with sessions

About Destination Porto, Portugal

Porto is a coastal city in northwest Portugal known for its stately bridges and port wine production. In the medieval Ribeira (riverside) district, narrow cobbled streets wind past merchants' houses and cafes. São Francisco Church is known for its lavish baroque interior with ornate gilded carvings. The palatial 19th-century Palácio de Bolsa, formerly a stock market, was built to impress potential European investors.

Porto features a warm-summer Mediterranean climate, with influences of an oceanic climate (like the north of Spain.)As a result, its climate shares many characteristics with the coastal south: warm, dry summers and mild, rainy winters. Cool and rainy days can, occasionally, interrupt the dry season. These occasional summer rainy periods may last a few days and are characterised by showers and cool temperatures around 20 °C (68 °F) in the afternoon. The annual precipitation is high and concentrated in the winter months, making Porto one of the wettest major cities of Europe. However, long periods with mild temperatures and sunny days are frequent even during the rainiest months.

Summers are typically sunny with average temperatures between 16 and 27 °C (61 and 81 °F), but can rise to as high as 38 °C (100 °F) during occasional heat waves. During such heat waves, the humidity remains quite low. Nearby beaches are often windy and usually cooler than the urban areas. Summer average temperatures are a few degrees cooler than those expected in more continentally Mediterranean influenced metropolises on the same latitude such as Barcelona and Florence

Winter temperatures typically range between 5 °C (41 °F) during morning and 15 °C (59 °F) in the afternoon, but rarely drop below 0 °C (32 °F) at night. The weather is often rainy for long stretches, although prolonged sunny periods do occur.

Porto district has the highest rate of tuberculosis positive cases in Portugal. Porto tuberculosis rates are at Third World proportions (comparatively, London faces a similar phenomenon).[68] The incidence of positive cases was 23/100 000 nationwide in 1994, with a rate of 24/100 000 in Lisbon and 37/100 000 in Porto. Porto area represented the worst epidemiological situation in the country, with very high rates in some city boroughs and in some poor fishing and declining industrial communities.

May 07-08
Porto, Portugal

Accommodations:

We are also providing accommodation at the same place where as our conference going to takes place, room rates start at \$180 including all taxes and breakfast.

Call T: + 040-68176321 or mail to 3dprinting-2020@scientificfederation.org to book your reservation. All reservations should be made under “Scientific Federation Conferences in order to receive the group rate Please reserve by **April 28, 2020** to ensure the group rate. Visit:
