About Dubai

Dubai is the largest and most populous city in the United Arab Emirates , It is located on the southeast coast of the Persian Gulf and is the capital of the Emirate of Dubai,

Dubai emerged as a global city and business hub of the Middle East. It is also a major transport hub for passengers and cargo. By the 1960s, Dubai's economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue first started to flow in 1969. Dubai's oil revenue helped accelerate the early development of the city,

The emirate's Western-style model of business drives its economy with the main revenues now coming from tourism, aviation, real estate, and financial services. Dubai was recently named the best destination for Muslim travellers by Salam Standard. Dubai has recently attracted world attention through many innovative large construction projects and sports events. The city has become iconic for its skyscrapers and high-rise buildings, in particular the world's tallest building, the BurjKhalifa. Dubai has been criticised for human rights violations concerning the city's largely South Asian and Filipino workforce.
