Welcome Message

Dear All,

Scientific Federation is pleased to announce **World Summit on Toxicology** during **June 11-12, 2018** at **Rome, Italy**. Toxicology deals with the study of the nature and action of poisons. It involves, noticing and reporting symptoms, mechanisms, detection and handlings of poisonous substances in particular relation to the injuring of humans. It will be a platform for the presentations and exposures of new trends and advances of the research work to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Toxicology. Furthermore, it is opportunity to join the international community in your field of interest and experience and explore Rome, Italy. The conference will be highlighting the theme **“New Perceptions and importance in the Field of Toxicology”** On behalf of Toxicology 2018, Scientific Federation invites you to take this opportunity to join us for academic exchange and visit the city of Rome, Italy.

Young Researchers Opportunity

- We make sure to support and motivate 'Young Researchers' by:
- Establishing their academic and professional relationships
- Improving their morale and confidence of presenting research in an international platform
- Interacting with expertise in their respective departments
- Clearing your inhibitions of adjusting to the foreign environment
- Providing a holistic experience of academic tourism

We look forward to seeing you in Rome in June, 2018...!!!

Best Regards
Toxicology Organizing Committee

Conference Highlights

The Scientific Federation brings you an immense opportunity to be a part of scientific acceleration to world class personalities, young scholars, scientific delegates and young scientists to join in this forum to utilize the expertise and novelties that brings a new era for innovations in the field of Toxicology which brings well versed scrutinizers at one place. It provides a platform to have open discussions, knowledge sharing and interactive sessions with field experts at Toxicology-2018. About Rome

Rome is the capital of Italy and a special comune (named Comune di Roma Capitale). Rome also serves as the capital of the Lazio region. With 2,877,215 residents in 1,285 km² (496.1 sq mi), it is also the country's most populated comune. Rome is the second largest metropolitan city in Italy after Milan and the largest economy in the country with Milan. It is the fourth-most populous city in the European Union by population within city limits. It is the center of the Metropolitan City of Rome, which has a population of 4.3 million residents.[2] Rome is located in the central-western portion of the Italian Peninsula, within Lazio (Latium), along the shores of the Tiber. The Vatican City is an independent country inside the city boundaries of Rome, the only existing example of a country within a city: for this reason Rome has been often defined as capital of two states.

Rome's history spans more than 2,500 years. While Roman mythology dates the founding of Rome at around 753 BC, the site has been inhabited for much longer, making it one of the oldest continuously occupied sites in Europe. The city's early population originated from a mix of Latins, Etruscans and Sabines. Eventually, the city successively became the capital of the Roman Kingdom, the Roman Republic and the Roman Empire, and is regarded as one of the birthplaces of Western civilisation and by some as the first ever metropolis. It was first called The Eternal City (Latin: Urbs Aeterna; Italian: La Città Eterna) by the Roman poet Tibullus in the 1st century BC, and the expression was also taken up by Ovid, Virgil, and Livy. Rome is also called the "Caput Mundi" (Capital of the World).
