

Welcome message

Welcome...!!!

Dear Colleagues and Friends,

The second edition of our world conference in [Rheumatology and Orthopedics](#) will take place in Paris on [September 26-27, 2019](#).

For this we are preparing a meeting with a great location to ensure that both attendees and speakers are as comfortable as possible and that the experience of our meeting is the most pleasant and fun.

On the other hand, our intention is to compile an update of the topics with more clinical importance that are having more impact in these years in the field of the musculoskeletal system and also allow, during the two days of the conference, the interactivity with the assistants and the possibility of deepening in the research areas that may arise, in such a way that we can create a link between different locations in the world for the benefit of patients.

It is the intention of the leadership of this conference to create working groups that join us all among the different countries that come to the meeting and develop research projects over time.

Therefore, a part of the conference will consist of the formation of these groups and the adjudication of tasks and projects that are considered possible. Of course, all the new ideas are welcome and from the organization of the conference we encourage all the speakers and assistants to participate in whatever projects they wish, whenever they are feasible.

Thank you very much everyone for deciding to come to our meeting and I hope and wish that it is not only a conference in which we all learn things, which is already a lot, but also a future project for the good of our patients and the research in general.

We will see you in September in Paris.

Do not hesitate to contact me for any questions or clarification. I'll be happy to clarify it.

Chair of [2nd World Congress on Rheumatology and Orthopedics](#)

Yours Sincerely

Dr. Jorge de las Heras Romero,
University General Hospital Reina Sofia,
Murcia, Spain
