Fiscal Code 80065250633

President Prof. GIULIO TARRO

**Welcome message for presentation at the 4th Global Conference and
Expo on Vaccines Research & Development.
February 10-11, 2020 Lisbon, Portugal.**

The acuteness of the emerging diseases and fundamental importance of research aimed at uncovering their agents places the theme of microbe involvement in vaccines among the most interesting and urgent problems in the field of medical science today.

It is therefore an honor for me and a great privilege to speak about the commitment at the 4th Global Conference and Expo on Vaccines Research & Development.

Furthermore, the Group wishes to extend this commitment into the future: it is its intention to continue these conferences in the next years. The topics to be selected shall cover a wide range and encompass the most up-to-date information on the multifactorial events which lead to potential pandemics in the world.

I would like to express my sincere thanks to the members of the Organizing Committee and to all who are contributing with their participation, help and interest in the success of this conference.

We shall gain in real time the knowledge concerning these agents and the involvement in human infectious diseases that represents one of the most important breakthrough point in the advancement of human vaccine research.

Naples, July 29, 2019

Giulio Tarro
